

Brandon, Florida (Newsworthy.ai) Thursday Dec 28, 2023 @ 7:00 AM Eastern —

TMS, a non-invasive treatment that utilizes magnetic fields to stimulate nerve cells in the brain, has shown remarkable success in treating depression, anxiety, obsessive-compulsive disorder (OCD), and pain. The clinic also extends its expertise to offer ketamine therapy, specifically Spravato, for depression treatment. This demonstrates their commitment to administering cutting-edge treatments to address a wide range of mental health conditions.

In recognition of the growing concern surrounding addiction, Brandon TMS and Psychiatry provides addiction treatment services, including medicated assisted treatment for opioid addiction, employing Sublocade, a monthly injection. Additionally, the clinic offers theta burst stimulation and cognitive function measurement services to bolster their comprehensive approach to care.

Dr. Boris Kawliche, the esteemed psychiatrist at Brandon TMS and Psychiatry, emphasizes the importance of taking into account various factors when caring for patients. “At our clinic, we strive to provide a well-rounded and comprehensive approach to care. We consider physical, genetic, developmental, emotional, cognitive, and social factors, allowing us to tailor treatments to individual needs,” states Dr. Kawliche.

Brandon TMS and Psychiatry has garnered positive testimonials from numerous patients who have found relief and support at the clinic. Harnessing the power of advanced treatments and a compassionate team, the clinic embodies a warm and empathetic environment designed to facilitate patients’ long-term well-being.
