

Warrenville, IL (Newsworthy.ai) Saturday Dec 30, 2023 @ 12:45 AM Eastern —

TMS therapy utilizes a magnet to stimulate specific nerve cells in the brain that are associated with mood regulation. These magnetic pulses can positively impact neurotransmitter levels, resulting in a significant decrease in the severity of depression symptoms.

During a TMS treatment session, patients are comfortably seated in a specialized treatment chair, and a magnet, similar to the one used in an MRI machine, is placed on their head. This magnet delivers precise and focused magnetic stimulation to the targeted areas of the brain. The treatment is completely non-invasive, has no impact on alertness or memory, and typically lasts between 19 and 37 minutes.

The TMS therapy provided by Conventions Psychiatry & Counseling has garnered positive feedback from patients who have experienced profound improvements in their mental well-being. Chris, a former patient, shared, "TMS therapy was a game-changer for me. After struggling with depression for years, I finally found a treatment that worked. It gave me the chance to start my road to happiness."

Conventions Psychiatry & Counseling invites individuals seeking effective and life-changing treatment options for depression to explore the transformative benefits of TMS therapy. With its non-invasive nature and potential for long-term remission, this breakthrough treatment provides hope for a brighter future.

About [Conventions Psychiatry & Counseling](#)

Conventions Psychiatry & Counseling is a comprehensive outpatient behavioral treatment center, offering cutting-edge services. Our medical staff and licensed clinicians have the expertise to provide you with education, medication management, and innovative strategies to help you make healthy changes.

We believe that everyone should have access to quality mental health services and are committed to diversity, equity, and inclusion. We support healthier communities by providing care at community mental health agencies, chemical dependency programs, and skilled nursing facilities.
