Australia/Perth —

Complex Regional Pain Syndrome, also known as CRPS, is a debilitating chronic pain condition that can significantly impact a person's quality of life. At [Scott Integrated Pain Management](#), we understand the importance of finding opioid alternatives for such complex pain conditions. That's why we are thrilled to offer the CRPS Ketamine treatment, which has shown significant success in managing CRPS pain.

Dr. Scott, the founding doctor of Scott Integrated Pain Management, expressed his excitement about this groundbreaking treatment, stating, "Our goal is to provide the most effective and compassionate care for our patients. The CRPS Ketamine treatment offers hope for individuals experiencing excruciating CRPS pain by targeting the central nervous system and resetting pain pathways. We believe this treatment will make a significant impact in their lives."

In addition to the CRPS Ketamine treatment, Scott Integrated Pain Management continues to offer a range of services to address various pain issues. These services include pain crisis management, opioid-free acute pain management, and depression treatments, including Spravato (ketamine) for refractory depression. The clinic is in-network with major insurance providers, including Medicare, United Healthcare, Independence Blue Cross and Blue Shield, Cigna, and Highmark BlueShield.

Scott Integrated Pain Management understands the importance of timely access to healthcare services. In an effort to facilitate patient care, the clinic provides an Athena Patient Portal, which allows patients to conveniently communicate with their healthcare team and access vital information.

About Scott Integrated Pain Management:

Scott Integrated Pain Management is a leading healthcare provider specializing in pain management. With a focus on finding opioid alternatives for complex pain conditions, the clinic offers innovative treatments and personalized care. Led by Dr. Scott, the clinic's dedicated team is committed to improving the quality of life for patients experiencing chronic pain.
