FOR IMMEDIATE RELEASE

Tampa, 15/08/2023

Cypherix announces the release of SecureIT (17.0.2 series), 448-bit file, folder encryption software. Version 17.0.2 contains several major enhancements. A detailed list of new features is available on the Cypherix website.

Secure IT encrypts any type of data on any Windows PC on any kind of media including removable Drives (USB Flash Drive). SecureIT is a simple, easy to use encryption program that password protects all your files and folders. Built in data shredder allows permanent file or folder deletion, shredding and leaves no trace of secret data behind. Selective File, Folder Compression feature allows you compress files, folders to save disk space and reduce transmission times. Secure Email module allows for the creation of self extracting encrypted files which can be sent by email or over the internet. The recipient need not have Secure IT installed to decrypt the files, all that is required is the password.

SecureIT File and Folder Encryption Software is an easy to use, feature packed program that protects all your files and folders. It includes virtual keyboard and privilege mode option that can help to prevent a keylogger from capturing keystrokes. This strong encryption software ensures that it is statistically impossible for an unauthorized person to access the encrypted data.

SecureIT works on all 32-bit & 64-bit versions of Windows including Windows 11 and Windows 10. Password protect any file or folder with Secure IT. Secure IT uses a 448-bit implementation of the Blowfish algorithm in Cipher Block Chaining (CBC) mode.

With over 8 million users, Secure IT is perhaps one of the most widely used encryption programs in the world. SIT offers a choice of Blowfish at 448-bit and 256-bit AES. Files or folders can be encrypted by right clicking on them or you can select the file/folder that you wish to encrypt in the Explorer area. You can also select multiple files or folders to encrypt. What you get is foolproof, hassle-free, unbreakable security. A must have for every desktop.

Pricing and availability:

SecureIT is available in English, German and French. One license of SecureIT costs $29.95.
