

## FOR IMMEDIATE RELEASE

TORONTO, CANADA - Thexyz, a leading provider of a wide range of digital solutions, is thrilled to announce the expansion of its [Affiliate Program](#) to [ShareASale](#), a renowned affiliate marketing network, along with its existing in-house platform. This move aims to broaden its partnership base and provide affiliates with more flexibility and opportunity.

Thexyz's affiliation with ShareASale brings with it a competitive one-time commission of 30% of the total sale price. This offering broadens the scope for affiliates to reap substantial benefits by promoting Thexyz's wide-ranging products and services, including Domain Names, NordVPN, Weebly and Site Builder, Server Monitoring, Open-Source Email Solutions, Google Workspace, and SEO Tools.

Parallel to this expansion, Thexyz continues to offer its in-house Affiliate Program, providing a 10% recurring commission. This program allows partners to continually earn from the customers they bring in, generating a passive income stream.

"Joining forces with ShareASale while maintaining our in-house program allows us to offer our affiliates more choices," said Perry Toone for Thexyz. "Affiliates can now choose the structure that best suits their business model, either earning a hefty one-time fee or enjoying a steady stream of passive income."

The launch of Thexyz Affiliate Program on ShareASale marks an exciting milestone for the company and its affiliate partners. Thexyz invites interested parties to explore these opportunities and create a profitable and mutually beneficial partnership.
